## SUPPORTING THE FAMILY WATCH

General Assembly in Cameroun where this project was supported

The Family Watch, which was presented during the last congress in Rome, has gained much strength in these last months and that's why we have seen fit to encourage them to reinforce their own identity with legal and functional autonomy, although in close contact with IFFD.

**THE FAMILY WATCH**

It's highly desirable to provide this think tank with an international advisory council. That's why we ask you to think and send us the name of a trusted person of your environment who could be part of it. We have already received candidates from Cameroun, Argentina and Ecuador. We look forward to your proposals.
